

I do not feel that cell phones should be approved on the aircraft in the air. This would be very disturbing to other passengers that are trying to get there work done on computers or trying to rest. The airplane would be extremely loud and feel that as a flight attendant we would just be referees on the aircraft and feel that the use of cell phones would jepordize the safety of passengers b/c they would not be paying attention to us during our safety breifing and if other passengers are trying to pay attention would not be able to hear us. As a flight attendant this was very disturbing to hear that there are talks about the use of cell phones on the plane, if people can't go a few hours without using there cell phone maybe they should drive and can talk in there vehicle.

Thank you
